

ROV1 24-Pin Recloser Control Cable

For testing of 24-pin style ABB OVR/VR3S recloser controls

The ROV1 24-Pin Recloser Control Cable serves as an accessory to CMC test sets for simple and comprehensive testing of ABB OVR/VR3S 24-pin style recloser controls such as:¹

- > ABB PCD
- > Schweitzer - SEL651R

The ROV1 24-Pin Cable is built with all components necessary to make a direct connection between the device to be tested and the CMC simulating the switch end with all of its currents, voltages, and status signals. The RIB1 Low Level Isolation Box (CMC 356, CMC 256plus, CMC 353) or the LLX3 Low Level Output Box (CMC 430) provides access to the CMC's low-level outputs for simulating the reclosers built-in capacitive voltage sensors. For automated testing, free sample test plans for the CMC operating software² can be downloaded from our website.

Ordering information for CMC 356, CMC 256plus, CMC 353

Order No.	Description
VEHK0197	ROV1 24-Pin Cable
VEHZ1160	RIB1 Isolation Box

Ordering information for CMC 430

Order No.	Description
VEHK0197	ROV1 24-Pin Cable
VEHZ1121	LLX3 Low Level Output Accessory

¹ Non-exhaustive list of supported recloser controls

² Test Universe PC software; OMICRON Control Center (OCC) required

OMICRON is an international company serving the electrical power industry with innovative testing and diagnostic solutions. The application of OMICRON products allows users to assess the condition of the primary and secondary equipment on their systems with complete confidence. Services offered in the area of consulting, commissioning, testing, diagnosis and training make the product range complete.

Customers in more than 160 countries rely on the company's ability to supply leading-edge technology of excellent quality. Service centers on all continents provide a broad base of knowledge and extraordinary customer support. All of this together with our strong network of sales partners is what has made our company a market leader in the electrical power industry.
