

ReCoPlan

What's New in Version 2.60

Compared to Version 2.50

1 General

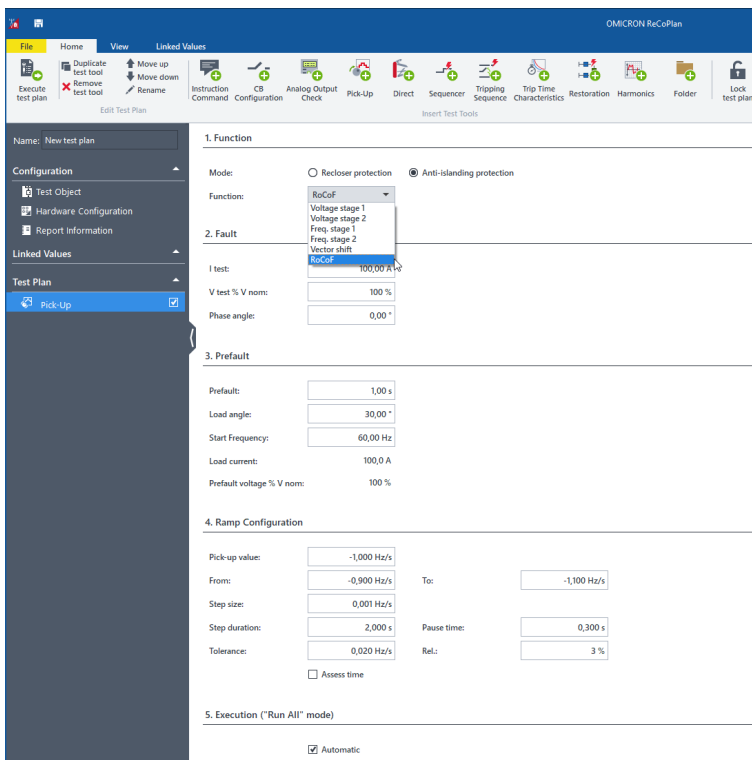

ReCoPlan 2.60 can work with test files that were created with any previous *ReCoPlan* version, whereas files created with *ReCoPlan* 2.60 cannot be opened with older versions. Test files created with *ReCoPlan* 2.60 can be executed with *ARCO Control* 1.60 for *ARCO* 400. The major changes compared to *ReCoPlan* 2.50 are listed below.

Other minor improvements and bug fixes have also been implemented but are not mentioned here.

2 What's new

2.1 The Pick-Up tool now includes anti-islanding protection testing

The Pick-Up Tool now includes enhanced options for testing anti-islanding protection within test plans. These new features allow users to easily define and configure flexible test scenarios, streamlining the planning and execution of anti-islanding protection tests.

2.2 Support for ARCO Control 1.60 features

ReCoPlan 2.60 supports all functions introduced with *ARCO Control* 1.60.

3 Minor changes

- > **Vulnerability Management:** All software components have been updated to address known vulnerabilities and ensure alignment with the latest security standards.
