

## CP DB1 - Transformer Discharge Box

### Accessory for CPC 100

#### CPC 100 with CP DB1 for faster discharging

The CP DB1 transformer discharge box facilitates fast discharging of power transformers after a test of the winding resistance.

A transformer must be discharged whenever the DC measurement of one phase has been completed. Thus you can save a lot of time by measuring with the CP DB1.

In 6 A operating mode the CP DB1 speeds up the discharging process by a factor of four, in 100 A operating mode by a factor of ten.

The CP DB1 is a CPC 100 accessory for testing with the RWinding and TRTapCheck (for OLTC) test cards.

CP DB1

#### Technical Data

<b>Duration of discharging process</b>	using 6 A path using 100 A path	4 times faster than without CP DB1 10 times faster than without CP DB1
<b>Temperature</b>	Operating Storage/Transport	-10 to +55 °C (+14 to + 131 °F) -20 to +70 °C ( -4 to + 158 °F)
<b>Dimensions (W x H x D)</b>	CP DB1 Carry Bag	357 x 235 x 147 mm (14.0 x 9.2 x 5.8 ") 400 x 310 x 200 mm (15.7 x 12.2 x 7.9 ")
<b>Weight</b>	CP DB1	4 kg / 8.8 lbs
<b>Scope of Delivery</b>	Connection cable to CPC 100; grounding cable; carry bag for transport	
<b>Order Number</b>	VEHZ 0695	

**OMICRON** is an international company serving the electrical power industry with innovative testing and diagnostic solutions. The application of OMICRON products allows users to assess the condition of the primary and secondary equipment on their systems with complete confidence. Services offered in the area of consulting, commissioning, testing, diagnosis, and training make the product range complete.

Customers in more than 130 countries rely on the company's ability to supply leading edge technology of excellent quality. Broad application knowledge and extraordinary customer support provided by offices in North America, Europe, South and East Asia, Australia, and the Middle East, together with a worldwide network of distributors and representatives, make the company a market leader in its sector.
