

CMC 310

Ordering Information

Ordering instructions

Step 1: Hardware
The CMC 310 is the main hardware unit of your choice.

Step 2: Control options
Choose between the CMControl P App, which runs on a standard Windows PC or Android tablet, or the CMControl P front panel control with touch screen display.

Step 3: Accessories
In this step, you can choose from a large number of basic accessories and others, tailored to a specific application or use-case. This step is optional, but recommended to get the full potential of the solution.

Hardware 1
Main unit
CMC 310 – Test set for basic three-phase testing

Control options 2
CMControl P App
Tablet app for easy manual testing of protection and measurement devices **P0005873**

Control options 2
CMControl P front panel control
Front panel control device for easy manual testing of protection and measurement devices **P0005872**

Accessories 3

Accessory	Order No.	Description
Wiring accessory package	B1764601	Various adapters for connecting test objects to CMC test sets
Mini wireless USB adapter	E1636800	For wireless control of a CMC test set
Transport case	B0679500	Heavy-duty transport case with wheels and extendable handle for safe & easy transport and shipping
Trolley/Backpack	E1636000	Trolley / Backpack for simple mechanical protection
CPOL2	P0006331	Handheld polarity checker
RXB1	P0006392	Binary output extension
CMTAC 1	P0006278	Rectifier to use AC trigger signals
SER1	P0006388	Scanning equipment for scanning the status indication LEDs of protection relays
VBO3	P0006276	Three-phase voltage transformer for up to 600 V (L-N)
ARC 256x	P0006279	Arc flash initiator for testing arc flash protection systems
SEM 1	P0006391	Scanning head for testing meters with optical pulse output
SEM 2	P0006390	Scanning head for testing meters with rotating disc or optical pulse output
SEM 3	P0006389	Magnetic scanning head for testing meters with optical pulse output
CMLIB B	P0006377	Provides access to the binary transistor outputs of the test set
