

CMC Swift

## What's New in Version 6.00

Compared to Version 5.00

# 1 General

*CMC Swift 6.00* is a recommended update for all users, offering expanded platform support and new features.

The major changes compared to *CMC Swift 5.00* are listed below. Many other minor improvements have also been implemented, but they are not mentioned here.

# 2 New Features, Improvements, and Changes

## 2.1 Support for Windows and Updated OS Requirements

With software version 6.00 *CMC Swift* expands support to Windows devices and PCs.

### Windows Requirements

*CMC Swift 6.00* is compatible with Windows 10 version 22H2 (build 19045) or later. Installation and future updates are handled via the Microsoft Store. For full connectivity with CMC devices (USB and Ethernet), it is recommended to install Device Link on the PC.

### Android Requirements

Minimum supported version: Android 10 (64-bit only).

### iOS Requirements

Minimum supported version: iOS 15.

## 2.2 Identify Feature for CMC 500 Devices

*CMC Swift 6.00* supports the Identify feature for *CMC 500* devices.

## 2.3 Support for Up and Down Arrow Keys

With *CMC Swift 6.00*, the up and down arrow keys on a keyboard can now be used to change values manually. This simplifies operation and enables precise control directly from the keyboard.
