

Stay on track!

How are your protection relays performing?

OMICRON's IEC 60255 testing solution offers an easy introduction into the IEC 60255 standards for performance evaluation of your relays.

Our testing solution includes:

- > More than 200 000 predefined test shots for IEC 60255-121 and IEC 60255-187-1
- > Automated documentation
- > Standard-compliant display of all test results

IEC 60255-121
IEC 60255-187-1
IEC 60255

Check the performance of your relays using our one-stop shop testing solution. Combine the IEC 60255-1xx test package with our hardware and software and benefit from a drastic reduction in the time needed for testing to IEC 60255 standards.

Required hardware

- > CMC 356
- > One or more CMS 356, depending on the power required

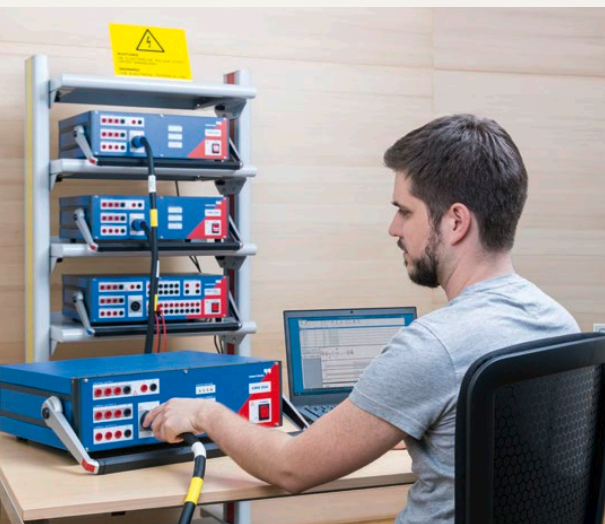

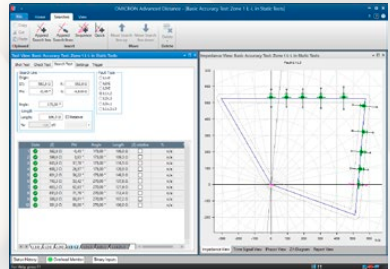

Required software

- > Test Universe
- > RelaySimTest
- > IEC 60255-1xx test packages with more than 200 000 predefined test shots for static and dynamic tests

IEC 60255-1xx as a service

Alternatively, OMICRON can also perform all your IEC 60255-121 and -187-1 testing on your behalf.
