

Recloser Control Testing with ARCO 400

 1.5 hours

 English

 Wprs03en

Become acquainted with the basics of recloser controller testing using the ARCO 400 in conjunction with the ARCO Control for executing tests, and the ReCoPlan software for creating customized test plans and templates

Objectives

- > Learn the background information about the components that make a recloser system
- > Discover the different reasons why you should be testing your recloser controllers
- > Experience the latest technology developed for recloser controller testing

Content

- > Review of recloser concepts
- > Explore the differences between recloser controller and relay testing
- > Received a guided walk through of how ARCO 400 makes testing recloser controllers easier
- > Guided walkthrough of key functions of the ARCO Control software
- > Gain knowledge of how to create your own test plan/template using ReCoPlan

Solutions

ARCO 400
ARCO Control
ReCoPlan

Audience

Technical personnel from
utilities and service providers
responsible for recloser
control testing

Prerequisites

Basic knowledge of protection
elements and recloser testing
